MONETA new web presence

MONETA Money Bank, a.s. is one of the largest banks in the Czech Republic and awarded pioneer in digitizing financial products. Moneta's goal is to become a digital leader in the Czech market.

„ableneo's deep knowledge and expertise of the Liferay solution was key success factor in the overall delivery and base for achieving our business goals."

Zenon Sliwka, Senior Manager of IT Retail Development
MONETA Money Bank, a.s.

about project

The project was a greenfield successor of the former Liferay 6.2 public web.

Client's business goal was to establish a position as a digital leader in the Czech market, improve UX for visitors and significantly raise the conversion rate in comparison to the former solution. Technical goal was to perform technology update, improve portal stability and redesign the implementation and delivery processes. ableneo was chosen as the guarantor of quality and stability of the solution. Our mission was to define Liferay architecture, setup and supervise development standards, design delivery automation and bring new technical solution for rapid javascript portal module development.

client

MONETA
MONEY BANK

facts&numbers

30+ team members of UX/UI analysts, developers & testers
30+ new portal frontend apps
2200 unit tests
1000 proven parallel visitors

technology stack

Liferay
Flow Typed
React
Redux-Saga
Immutable-js

challenges

Tailoring portal development process for multi-vendor delivery in dynamic customer environment performing digital transformation.

Creating new production ecosystem for effective JS/React portal apps. Allowing front-end javascript team to create and test portal modules out of Liferay. But in the same time design the JS modules to be full-featured portlets keeping all the portal world flexibility.
